

# Cell on Wheels

## Strommontazh Cell on Wheels (COW) Mobile Towers

have been designed to provide quick, convenient communication systems offering cost-effective construction solutions which can be rapidly deployed at a mobile site in under two hours. Perfectly suited for temporary cellular sites such as special productions, unusual events or disaster areas, Strommontazh COW systems provide high-quality, on-demand communication capabilities for a wide range of needs. The Strommontazh on Wheels systems come readily equipped with a convenient diesel generator and solar panel as well as a complete air conditioning and electricity system and can be painted on your corporate colours
